Jason Palmeri
Assignment 9.2
CSD200

Activity 1

1. What does this feature need to do
   a. As an **Owner** I Need **my business's website to accept service requests online**, so that **I can easily track what people are needing, track sales, and make booking services easier for clients, and my staff**
2. How will we know this is complete
   a. As an **Developer** I will know that this project is complete when **the website fully functions without the need to fix bugs and errors**
3. Where does the process start
   a. As an **Developer** the process starts when **I have all the details of the project, and a design from the Designer**, so that **I can start working on developing the new features**
4. Where would the user access this feature
   a. As an **Owner** I know that the user would access these features from **anywhere that they have internet access**
5. Where would the user be located physically when using this feature
   a. As an **Owner** I know that the user would be physically located in **a variety of places, such as at home, or on the go**, so the features need to be **usable on both desktop, tablet, and mobile devices**
6. Where would the results be visible
   a. As an **Owner** I Need **an admin panel to track stats on how my business is doing**, so that **I can further improve my business with these statistics**
7. When will this feature be used
   a. As an **Customer** I Need **this booking feature**, so that **I can quickly book the services I need online**
8. Who will use this feature
   a. As an **Owner** I know that this feature will be used by **me the owner, to check on sales, my staff, to check the schedule of appointments, and my customers, to book these services when they need them**
9. Who will deliver the inputs for the feature
   a. As an **Customer** I Need **a functional UI, and working systems**, so that **I can input my data to book the services that I need**
10. Who will learn about the results of someone using this feature
    a. As an **Owner** I Need **a complex admin panel**, so that **I can view the data in an easy to read format and check how my business is doing**

Activity 2

9: Who will deliver the inputs for the feature

Task	Size of Task	Time per Task (points)
(UI) Research similar organizations designs	3/10	3 points
(UI) study current UI layout to flawlessly integrate new systems	5/10	5 points
(Dev) Research latest web technologies	3/10	5 points
(Dev) Study current system to flawlessly incorporate new systems	3/10	5 points
(Dev) Research and decide on a back-end system to gather the inputs	3/10	5 points

10: Who will learn about the results of someone using this feature

Task	Size of Task/Points	Time per Task (points)
(UI) research what type of things the Owner would like to see on the admin panel	5/10	5 Points
(UI) research similar admin panels	3/10	3 Points
(Dev) Research best coding practices for an admin panel	3/10	5 Points
(Dev) Create reusable components for the admin panel	5/10	6 Points
(Dev) Incorporate the designs from UI Designer	4/10	3 Points

Activity 3
I chose the admin panel. I think it's an important part of a system like this, especially for the Owner, who wants to see statistics, revenue, and appointments. This page can be used by both the Owner, and any staff that would be working with the grooming, training, and boarding team.
